The Violence Prevention Forum
2015-2022

A new model for innovation and collaboration in violence prevention
VPF values

- Respect
- Empathy
- Collaboration and partnerships
- Active listening
- Deep democracy
- Fun
- Commitment and courage
Our definition of violence prevention

Developed collaboratively through consultation with government, children, NGOs, researchers, and development partners and the private sector

Violence prevention is the whole of society working deliberately and sustainably to remove sources of harm and inequality, and heal woundedness, by intentionally growing an ethic of mutual care, respect and inclusion to build peace.
